i. Introduction:

Following technology updates to keep up with market needs and offering advanced solutions, solving customer problems, saving time and money from this perspective Smartech systems appear.

Smartech systems, essential policy is to follow the updates in electronics technology field also we seek to be a partner with leading institutions to Provide our customers by the up-to-date technology required; in the most suitable form tailored to their specific needs. This facilitates handling business properly meanwhile considering their expense budgets.

ii. Policy:

Newest Design of Technology and Electronic Systems

The company provides proper solutions for various electronic applications in terms of control, automation, data communication and IT solutions, following the latest technology, under the supervision of professional engineers, Expert designers which entitles the company to offer optimum solutions & technical support based on internationally approved and locally applicable standards to maintain commitment for customer satisfaction.

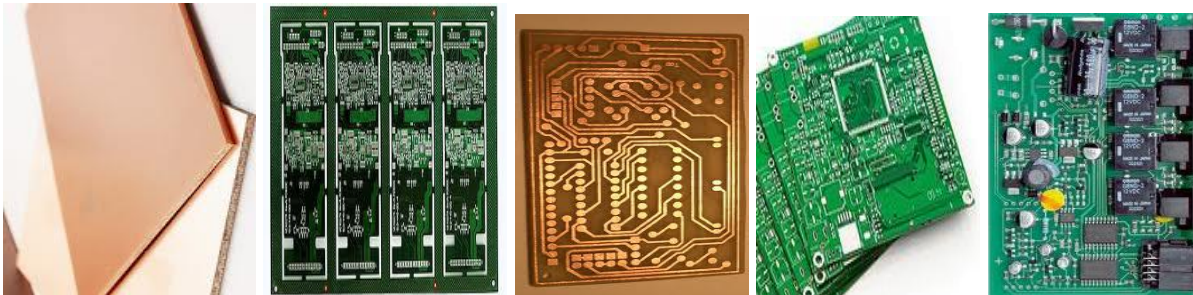

iii. Company Facts Sheet:

Company Name	SMARTECH SYSTEMS
Trade Name	Smartech Systems
Nationality	Egyptian
Address	9 Obour Buildings , salah salem st. , cairo
Phone	+202-24014067
Fax	+202-24014067
E-mail	info@smartechnsystems.net
URL	http://www.smartechsystems.net
Activities	<p>PCB design ,reverse engineering, copying & fabrication with the ability to assembly electronic components for prototype & mass production , single ,double or multilayer PCB.</p> <p>Embedded System design, implementation, programming and Integration, site installation in the field of control, automation including development, upgrading & system analysis.</p> <p>RFID technology- based solution for enterprises and industry in various applications of security, system development, logistics ,assets management .</p> <p>Vehicles GPS tracking system design, installation with full anti-theft</p> <p>IT – Marketing, selling, installing and maintaining all types of networking (wired, wireless, hybrid) for various purposes (data – voice – video conference)</p>
Legal Status	Egyptian joint stock Company, incorporated under Egyptian Investment Authority No. 8 for year 1997.
Authorized Capital	1,000,000 EGP
Banks	Alex Bank, Intesa Sanpaolo, NBE

iv. Activities:

1. PCB Design, Production & Assembly

PCB design, fabrication and assembly for prototype & mass production following standards & customer needs.

2. Advanced technology solutions

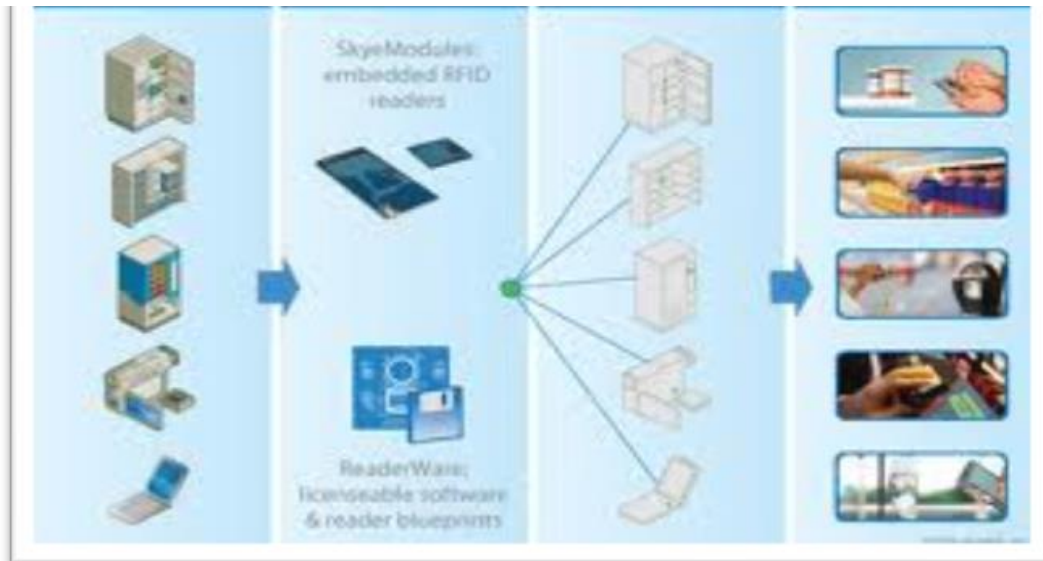

Our company engineers team includes hardware experts & embedded system programmers (μ -controller – PLC) with dense experience in the electronics field interpreting the customer needs for new projects or old systems upgrading into reality for the scale of small & medium business in addition to design and implementation of all the different control systems for machines.

3. *RFID based solutions for industrial applications*

The company design, supply and install all types of RFID technology -based systems for various standard/tailored applications of Security ,Door Access, Restricted Area Entrance, Attendance, Business Cards, Cargo Tracking, Assets Management/inventory, logistics ...etc connecting the system to any operating system platform like IOS, Android, windows and linux.

4. *Vehicles Tracking System*

The company designed and installed all tracking systems for any type of vehicles allowing route and load monitoring, as well as anti-theft alarm and through follow-up car on digital maps can locate the car at any time.
